1.1 DRINKING ADVICE BEFORE MARRIAGE

There is a disturbing quality to the "advice" I received since it was less about my well-being but more about an indirect prediction of negative events in the future.

Considering

- (how I can

PERSON A once offered a specific advice framed as wisdom: "Before marriage, you should follow your cousin's example (my father's side - second eldest son's wife's daughter married). Drink with a man multiple times as a test; use the alcohol to determine his true character." On the surface, it sounded like a practical caution, but in the context of my life and the contract, (how I will lose "Alfie" (the person who I will be engaged with)

feel that the true nature of this "guidance" was not genuine

The reason is, when I finally came to her with the truth—that I had been involved in an nonconsensual sexual intercourse, she didn't offer any advice on how to prevent or heal in the future, but offered one phrase: Just a cold **"did it hurt?"** The conversation didn't progress afterward or was this sexual event mentioned or brought up.

Another incident that's probably more closer to accurate prediction was
